

HEMORRHAGE CONTROL

TACTICAL TRAUMA TREATMENT BANDAGE (T3)

T3: NEXT GENERATION BANDAGE

MULTIFUNCTIONAL

The T3 Bandage offers a compact, multifunctional solution to effectively treat a wide range of injuries including conventional wounds, abdominal and large wounds, amputations, and entry and exit wounds. The T3's versatile design provides a two-bandage solution for cleaning, covering, and compressing single or multiple wounds, allowing users to render aid prior to the arrival of first responders.

INTUITIVE

This all-in-one bandage is an ideal component of any first aid combat kit. Its compact design - which is similar in size to the Emergency Bandage® - reduces the equipment-load of military personnel and provides an immediate solution for any type of injury. The T3's intuitive design allows for easy application by untrained personnel, making it an ideal personal field dressing for every soldier.

ESSENTIAL

The T3 Bandage features patent pending technology for a large, fully expandable and detachable sterile dressing pad with an integral pressure applicator for immediate direct pressure, an elasticized wrapping leader with stop-and-go release, an easy-to-use closure bar, and extractable gauze for cleaning or for use as a secondary wound dressing.

The T3 Bandage design is based on the Emergency Bandage® - an integral component of emergency hemorrhage control and wound treatment in pre-hospital situations used by military and civilian organizations worldwide. The T3 Bandage can be used like the Emergency Bandage® and does not require new training.

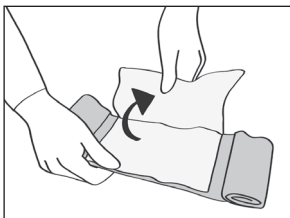

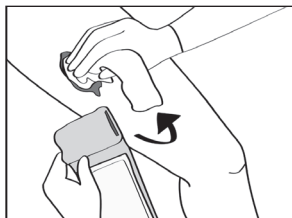

MULTIFUNCTIONAL, INTUITIVE, ESSENTIAL

MULTI-BANDAGE FEATURES
