BECAUSE EVERY SECOND COUNTS

In Emergency medicine, the Golden hour refers to a time period lasting from a few minutes to several hours following traumatic injury being sustained by a casualty, during which there is the highest likelihood that prompt medical treatment will prevent death.

What happens when you start to bleed? Normal Adult Blood Volume is 5 Liter. It depends on how much blood you lose

Normal Human Body approx. 5 Ltr	Blood Loss			
	Stage-I Up to 15% (750ML)	Stage-II Up to 30% (1500 ML)	Stage-III Up to 40% (2000ML)	Stage-VI Over 40% (Over 2000ML)
				
Blood Pressure 	Normal	Increased diastolic	Systolic <100	Systolic <70
Heart Rate 	Normal	Slightly Abnormal >100bpm	Abnormal >120bpm	Extreme Abnormal >140bpm, Weak Pluse
Breathing 	Normal	Increased >20	Abnormal Rapid >30	Extreme Rapid
Mental Status 	Normal	Anxiety, Restless	Altered, Confused	Unconsciousness, Lethargy, Coma

PREPARE ANYONE Anywhere TO SAVE A LIFE...

(For Individual Use Home/Four Wheelers & Two Wheelers)

It can easily be stored in places such as a car, backpack, office drawer, or cabinet at home

Because every second counts

To prevent deaths from traumatic injuries, we have designed the personal version of the Life Saving Bleeding Control Kit. It contains the necessary items to control and stop further bleeding of a victim.

Life Saving Bleeding Control Kit

- The Israeli Bandage
- The Thermal Blanket / Multipurpose Rescue Sheet.
- Pair of Gloves

The Israeli Bandage

The Emergency Bandage® is a multifunctional hemorrhage control solution.

FEATURES

- **Non-pneumatic trauma bandage**
- Can apply **13-14 Kg of pressure** to the wound
- Multi-functional bandage for various wounds
- Compact, lightweight, waterproof, and vacuum sealed packaging
- Sterile, best-in-class **8-year shelf life**
- Integrated pressure bar exerts immediate and direct pressure to the wound
- Built-in closure bar: no pins, no clips, no tape, no hook-and-loop, no knots
- Non-adherent 4" pad eliminates pain during removal and prevents wound re-opening
- Cost-effective

Thermal Blanket/Multipurpose Rescue Sheet.

When to Use

- The body under stress can lose much of its body heat due to blood loss, perspiration etc.
- Thermal blankets keep the user warmer without the bulk of heavy linens.
- Because of its special material, thermal blankets effectively trap heat in and prevent Temperature drops in the body.

Features

- Thermal blankets are lightweight.
- Thermal blankets are relatively easier to clean and store
- Portable waterproof emergency space rescue thermal foil
- Size : 210*130cm
