

NIO Simulation Kit

Adult/Pediatric

Overview

Safe, Realistic Intraosseous Simulation

The NIO Simulation™ Adult & Pediatric Kit offers an unmatched IO simulation experience. Its reduced-length trocar and cannula allows users to not only learn but to experience landmarking and deploying the NIO Simulation™ Adult or NIO Simulation™ Pediatric on simulation manikins, as well as a on other users (NIO Simulation™ Adult only)."

Product Information

- Hyper-realistic training experience allows users to harmlessly simulate IO deployment on one another
- Reduced length trocar and cannula ensures safety
- Functions damage-free on all simulation manikins
- Most realistic IO simulation available
- Facilitates accurate placement
- Multiple uses per device
- Cost-effective
