

## Waysafe

illuminated safety guideline to Emergency Services and security organisations

Waysafe is devised to give long-term, autonomous marking, signaling, and guidance when visibility is low using a bright continuous luminescence rope. Its aim is to provide assistance and security to all divers who need guiding in low or no visibility water conditions, in either open or closed environments. Users can see and be seen in the dark, while remaining free in to undertake the required activity. The luminous lifelines provides operators with greater security and efficiency and reduces stress levels. Waysafe sturdy construction is designed for professional use.

### Features and Benefits:

- Pressure Resistant to 10 Bars / 100m
- Tensile Force 40 Kg
- Negative buoyancy
- Battery Autonomy 3.5 Hours
- Colours: Blue/Green and Lime/Green
- Battery Technology Li-ion
- Length 25m
- Charging Time 90 -240 VAC 2.5 -3 Hours
- Diameter 4 mm
- Approval CE
- 135mm x 139mm x 195 mm

110/240v Directional

110/240v Battery Backup

110/240v Static
